

PROCEEDINGS OF SPIE

Autonomous Air and Ground Sensing Systems for Agricultural Optimization and Phenotyping II

**J. Alex Thomasson
Mac McKee
Robert J. Moorhead**
Editors

**10–11 April 2017
Anaheim, California, United States**

Sponsored by
SPIE

Cosponsored by
Monsanto Company (United States)

Published by
SPIE

Volume 10218

Proceedings of SPIE 0277-786X, V. 10218

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Autonomous Air and Ground Sensing Systems for Agricultural Optimization and Phenotyping II,
edited by J. Alex Thomasson, Mac McKee, Robert J. Moorhead, Proc. of SPIE Vol. 10218,
1021801 · © 2017 SPIE · CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2280884

Proc. of SPIE Vol. 10218 1021801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- v *Authors*
vii *Conference Committee*

FIELD-BASED PHENOTYPING WITH GROUND-BASED AND AERIAL SENSOR PLATFORMS

- 10218 02 **Scaling up high throughput field phenotyping of corn and soy research plots using ground rovers (Invited Paper)** [10218-1]
10218 03 **Automated phenotyping of permanent crops** [10218-2]
10218 04 **A custom multi-modal sensor suite and data analysis pipeline for aerial field phenotyping** [10218-3]
10218 05 **Hyperspectral imaging to identify salt-tolerant wheat lines (Runner-Up Best Paper Award)** [10218-4]

CONTROL SYSTEMS AND ARTIFICIAL INTELLIGENCE IN AGRICULTURAL UAV APPLICATIONS

- 10218 06 **Towards collaboration between unmanned aerial and ground vehicles for precision agriculture (Invited Paper)** [10218-5]
10218 07 **Automatic mission planning algorithms for aerial collection of imaging-specific tasks** [10218-6]
10218 08 **Melon yield prediction using small unmanned aerial vehicles** [10218-7]
10218 09 **Real-time yield estimation based on deep learning** [10218-8]

PRACTICAL ISSUES FOR COMMERCIALIZATION OF UAVS IN AGRICULTURE

- 10218 0A **Use of UAV for support of intensive agricultural management decisions: from science to commercial application (Invited Paper)** [10218-9]
10218 0B **A case study of comparing radiometrically calibrated reflectance of an image mosaic from unmanned aerial system with that of a single image from manned aircraft over a same area** [10218-10]
10218 0C **UAV remote sensing for phenotyping drought tolerance in peanuts** [10218-11]
10218 0E **UAS imaging for automated crop lodging detection: a case study over an experimental maize field (Best Paper Award)** [10218-13]

AERIAL AND GROUND-BASED SENSING OF CRITICAL AGRICULTURAL PHENOTYPES AND CONDITIONS

- 10218 0F **Vineyard management in virtual reality: autonomous control of a transformable drone (Invited Paper)** [10218-14]
- 10218 0G **Distinguishing plant population and variety with UAV-derived vegetation indices** [10218-15]
- 10218 0H **A predictive model for turfgrass color and quality evaluation using deep learning and UAV imageries** [10218-16]
- 10218 0I **3D reconstruction optimization using imagery captured by unmanned aerial vehicles** [10218-17]

THE WAY FORWARD IN UAV-BASED SENSING FOR AGRICULTURAL PRODUCTION

- 10218 0K **Automated geographic registration and radiometric correction for UAV-based mosaics (Invited Paper)** [10218-19]
- 10218 0L **Swimming in sensors and drowning in data: what is needed for UASs to be effective? (Invited Paper)** [10218-20]
- 10218 0M **The remote sensing data from your UAV probably isn't scientific, but it should be! (Invited Paper)** [10218-21]

POSTER SESSION

- 10218 0P **Automated information-analytical system for thunderstorm monitoring and early warning alarms using modern physical sensors and information technologies with elements of artificial intelligence** [10218-24]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

Majid Rabbani, Rochester Institute of Technology (United States)

Symposium Co-chair

Robert Fiete, Harris Corporation (United States)

Conference Chairs

J. Alex Thomasson, Texas A&M University (United States)

Mac McKee, Utah State University (United States)

Robert J. Moorhead, Mississippi State University (United States)

Conference Program Committee

Atanu Basu, Ayata (United States)

Christoph Bauer, KWS SAAT AG (Germany)

Subodh Bhandari, California State Polytechnic University, Pomona (United States)

Andrew N. French, Agricultural Research Service (United States)

Yufeng Ge, University of Nebraska-Lincoln (United States)

Brien Henry, Mississippi State University (United States)

Changying Li, The University of Georgia (United States)

Seth C. Murray, Texas A&M University (United States)

Haly Neely, Texas A&M University (United States)

Noboru Noguchi, Hokkaido University (Japan)

Boyan Peshlov, Monsanto Company (United States)

Francisco Rovira Más, Universitat Politècnica de València (Spain)

Sindhuja Sankaran, Washington State University (United States)

Ajay Sharda, Kansas State University (United States)

Yeyin Shi, University of Nebraska-Lincoln (United States)

Session Chairs

- 1 Field-based Phenotyping with Ground-based and Aerial Sensor Platforms

J. Alex Thomasson, Texas A&M University (United States)

- 2 Control Systems and Artificial Intelligence in Agricultural UAV Applications

Robert J. Moorhead, Geosystems Research Institute (United States)

- 3 Practical Issues for Commercialization of UAVs in Agriculture
Mac McKee, Utah State University (United States)
- 4 Aerial and Ground-based Sensing of Critical Agricultural Phenotypes and Conditions
Mac McKee, Utah State University (United States)
- 5 The Way Forward in UAV-based Sensing for Agricultural Production
Robert J. Moorhead, Geosystems Research Institute (United States)
- 6 Artificial Intelligence for Weather Prediction in Sensor-based Precision Agriculture
J. Alex Thomasson, Texas A&M University (United States)
