SPIE

Volume 7096

Proceedings of SPIE, 0277-786X, v. 7096

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Adaptive Coded Aperture Imaging and Non-Imaging Sensors II*, edited by David P. Casasent, Stanley Rogers, Proceedings of SPIE Vol. 7096 (SPIE, Bellingham, WA, 2008) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/08/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v *Conference Committee*

SESSION 1 IMAGING AND NON-IMAGING SENSOR NEEDS

7096 03 **Multifunctional imaging systems (Invited Paper)** [7096-02]
K. Lewis, Sciovis, Ltd. (United Kingdom)

SESSION 2 IMAGING AND NON-IMAGING DIFFRACTION SYSTEM CONCEPTS

7096 05 **Pupil plane multiplexing for multi-domain imaging sensors (Invited Paper)** [7096-04]
R. Horstmeyer, G. W. Euliss, R. A. Athale, The MITRE Corp. (United States); R. L. Morrison,
R. A. Stack, Distant Focus Corp. (United States); J. Ford, Univ. of California, San Diego
(United States)

7096 07 **Optically multiplexed imaging with superposition space tracking** [7096-06]
S. Shikhar, N. A. Goodman, Univ. of Arizona (United States); M. A. Neifeld, Univ. of Arizona
(United States) and The Optical Sciences Ctr., Univ. of Arizona (United States); C. Kim,
J. Kim, D. J. Brady, Duke Univ. (United States)

7096 08 **Direct reconstruction of difference images from optimal spatial-domain projections**
[7096-07]
S. Uttam, N. A. Goodman, Univ. of Arizona (United States); M. A. Neifeld, Univ. of Arizona
(United States) and The Optical Sciences Ctr., Univ. of Arizona (United States)

7096 09 **Adaptive coded aperture imaging in the infrared: towards a practical implementation**
[7096-21]
C. W. Slinger, K. Gilholm, N. Gordon, M. McNie, D. Payne, K. Ridley, M. Strens, M. Todd,
G. De Villiers, P. Watson, R. Wilson, QinetiQ Malvern (United Kingdom); G. Dyer, Goodrich
ISR Systems (United States); M. Eismann, J. Meola, S. Rogers, Air Force Research Lab. (United
States)

SESSION 3 IMAGING AND NON-IMAGING ALGORITHMS

7096 0C **Design and analysis of a coded aperture imaging system with engineered PSFs for wide
field of view imaging** [7096-11]
A. Mahalanobis, Lockheed Martin (United States); M. Neifeld, Univ. of Arizona (United
States); B. V. K. Vijaya Kumar, Carnegie Mellon Univ. (United States); T. Haberfelde,
Lockheed Martin (United States)

SESSION 4 DIFFRACTION IMAGING HARDWARE I

- 7096 0D **A large area reconfigurable MOEMS microshutter array for coded aperture imaging systems** [7096-12]
M. E. McNie, D. O. King, N. Price, D. J. Combes, G. W. Smith, A. G. Brown, N. T. Gordon, S. M. Stone, K. M. Brunson, K. L. Lewis, C. W. Slinger, QinetiQ, Ltd. (United Kingdom); S. Rogers, Air Force Research Labs. (United States)
- 7096 0E **Artificial eyelid dynamic aperture optical arrays for large scale coding elements with application in the visible to MWIR** [7096-13]
S. Goodwin, B. R. Stoner, J. Carlson, RTI International (United States); S. Rogers, Air Force Research Lab. (United States)
- 7096 0G **Fabrication studies for scaling photonic MEMS micro-shutter designs** [7096-15]
D. Langley, S. Rogers, Air Force Research Lab. (United States); L. Starman, Air Force Institute of Technology (United States)

SESSION 5 DIFFRACTION IMAGING HARDWARE II

- 7096 0H **Robustness of photonic MEMS adaptive coded aperture imagers to technology defects and yields** [7096-16]
O. Sternberg, Booz Allen Hamilton (United States); E. Jaska, Consultant (United States)
- 7096 0K **Micro-shutter developments for IR applications** [7096-19]
L. A. Starman, Air Force Institute of Technology (United States); D. Langley, S. Rogers, Air Force Research Lab. (United States)
- 7096 0L **Reconfigurable-pitch photonic MEMS devices** [7096-20]
D. Langley, S. Rogers, Air Force Research Lab. (United States); L. Starman, Air Force Institute of Technology (United States)

Author Index

Conference Committee

Conference Chairs

David P. Casasent, Carnegie Mellon University (United States)
Stanley Rogers, Air Force Research Laboratory (United States)

Cochairs

Timothy Clark, Defense Advanced Research Projects Agency
(United States)
Keith L. Lewis, Electro Magnetic Remote Sensing Defence Technology
Centre (United Kingdom)

Program Committee

David J. Brady, Duke University (United States)
Michael T. Eismann, Air Force Research Laboratory (United States)
Stephen R. Gottesman, Northrop Grumman Corporation
(United States)
Abhijit Mahalanobis, Lockheed Martin Missiles and Fire Control
(United States)
Mark A. Neifeld, The University of Arizona (United States)
Demetri Psaltis, California Institute of Technology (United States)
Christopher W. Slinger, QinetiQ, Ltd. (United Kingdom)
Nikola S. Subotic, Michigan Tech Research Institute (United States)
Rebecca A. Wilson, QinetiQ, Ltd. (United Kingdom)

Session Chairs

- 1 Imaging and Non-Imaging Sensor Needs
Stanley Rogers, Air Force Research Laboratory (United States)
David P. Casasent, Carnegie Mellon University (United States)
- 2 Imaging and Non-Imaging Diffraction System Concepts
Stephen R. Gottesman, Northrop Grumman Corp. (United States)
Timothy Clark, Defense Advanced Research Projects Agency
(United States)
- 3 Imaging and Non-Imaging Algorithms
Nikola S. Subotic, Michigan Tech Research Institute (United States)
Michael T. Eismann, Air Force Research Laboratory (United States)

- 4 Diffraction Imaging Hardware I
Lavern A. Starman, Air Force Institute of Technology (United States)
Keith L. Lewis, Electro Magnetic Remote Sensing Defence Technology
Centre (United Kingdom)
- 5 Diffraction Imaging Hardware II
Derrick Langley, Air Force Research Laboratory (United States)
Oren Sternberg, Booz Allen Hamilton (United States)
