

PROGRESS IN BIOMEDICAL OPTICS AND IMAGING

Vol. 10, No. 30

Reporters, Markers, Dyes, Nanoparticles, and Molecular Probes for Biomedical Applications

**Samuel Achilefu
Ramesh Raghavachari**
Editors

**26–29 January 2009
San Jose, California, United States**

Sponsored and Published by
SPIE

Volume 7190

Proceedings of SPIE, 1605-7422, v. 7190

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Reporters, Markers, Dyes, Nanoparticles, and Molecular Probes for Biomedical Applications*, edited by Samuel Achilefu, Ramesh Raghavachari, Proceedings of SPIE Vol. 7190 (SPIE, Bellingham, WA, 2009) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 1605-7422/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

The logo for SPIE Digital Library features the word "SPIE" in a bold, sans-serif font above the words "Digital Library" in a smaller, lighter font. To the right of the text is a stylized graphic consisting of three vertical bars of increasing height, resembling a bar chart or a signal waveform.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii *Conference Committee*

MOLECULAR IMAGING AND THERAPY STRATEGIES I

- 7190 05 **Approaches to a broad range of high performance PDT sensitizers** [7190-03]
A. M. d' A. Rocha Gonsalves, A. C. Serra, M. Pineiro, M. F. Botelho, Univ. de Coimbra (Portugal)

NANOPARTICLES IN IMAGING AND THERAPY I

- 7190 0D **Plasmon resonant gold-coated liposomes for spectrally coded content release** [7190-11]
S. J. Leung, T. S. Troutman, M. Romanowski, The Univ. of Arizona (United States)

NANOPARTICLES IN IMAGING AND THERAPY II

- 7190 0F **Dynamic properties of different kinds of nanoparticles in mouse model after intravenous administration** [7190-13]
Y. Gu, J. Zhang, H. Chen, China Pharmaceutical Univ. (China); Z. Qian, Nanjing Univ. of Aeronautics and Astronautics (China)
- 7190 0I **Design and development of multifunctional contrast agents for photoacoustic imaging** [7190-16]
K. Homan, S. Gomez, H. Gensler, J. Shah, The Univ. of Texas at Austin (United States); L. Brannon-Peppas, Appian Labs LLC (United States); S. Emelianov, The Univ. of Texas at Austin (United States)

NEAR-INFRARED FLUORESCENT MOLECULAR PROBES DESIGN AND SYNTHESIS

- 7190 0J **Near-infrared dyes for molecular probes and imaging (Invited Paper)** [7190-18]
G. Patonay, G. Beckford, L. Strekowski, M. Henary, J. S. Kim, S. Crow, Georgia State Univ. (United States)
- 7190 0L **A novel indocyanine green nanoparticle probe for non invasive fluorescence imaging in vivo** [7190-20]
F. P. Navarro, M. Berger, M. Goutayer, S. Guillermet, CEA-LETI MINATEC (France); V. Jossierand, FLORALIS-INSERM, Institut Albert Bonniot (France); P. Rizo, F. Vinet, I. Texier, CEA-LETI MINATEC (France)
- 7190 0M **In vivo imaging using a VEGF-based near-infrared fluorescent probe for early cancer diagnosis in the AOM-treated mouse model** [7190-21]
A. M. Winkler, P. F. S. Rice, J. Weichsel, The Univ. of Arizona (United States); M. V. Backer, J. M. Backer, SibTech, Inc. (United States); J. K. Barton, The Univ. of Arizona (United States)

OPTICAL MOLECULAR PROBES AND INDUSTRY

- 7190 ON **Near infrared probes for biochemical, cellular, and whole animal analysis of disease processes (Invited Paper)** [7190-22]
J. Kovar, V. Boveia, H. Chen, X. Peng, R. Skopp, G. Little, D. Draney, D. M. Olive, LI-COR Biosciences (United States)
- 7190 OP **N-alkylated aminopyrazines for use as hydrophilic optical agents** [7190-24]
A. R. Poreddy, B. Asmelash, K. P. Galen, R. M. Fitch, J.-J. Shieh, J. M. Wilcox, T. M. Schoenstein, J. K. Wojdyla, K. R. Gaston, J. N. Freskos, W. L. Neumann, R. Rajagopalan, Covidien Imaging Solutions (United States); H.-Y. Ahn, Univ. of Central Florida (United States); J. G. Kostelc, M. P. Debreczeny, Covidien Imaging Solutions (United States); K. D. Belfield, Univ. of Central Florida (United States); R. B. Dorshow, Covidien Imaging Solutions (United States)
- 7190 OQ **Phosphorescent nanoparticles and their applications for time-resolved luminescent biological assays** [7190-25]
X. Song, L. Huang, Kimberly Clark Corp. (United States); M. Knotts, Georgia Tech Research Institute (United States); B. Wu, Phosphorex, Inc. (United States)

FLUORESCENCE LIFETIME PROBES AND METHODS I

- 7190 OR **Fluorescence lifetime imaging study of a single cell: stress-induced environmental change and electric field effects on fluorescence (Invited Paper)** [7190-26]
N. Ohta, T. Nakabayashi, I. Nagao, M. Kinjo, Hokkaido Univ. (Japan); Y. Aoki, National Institute for Basic Biology (Japan) and Hokkaido Univ. (Japan); M. Tanaka, National Institute for Basic Biology (Japan)
- 7190 OS **Relative concentration of fluorophores in a scattering medium using fluorescence lifetime contrast** [7190-27]
D. J. Hall, S.-H. Han, Univ. of California, San Diego (United States)
- 7190 OT **In vivo imaging with near-infrared fluorescence lifetime contrast** [7190-28]
W. J. Akers, M. Y. Berezin, H. Lee, S. Achilefu, Washington Univ. in St. Louis School of Medicine (United States)
- 7190 OU **Multiparameter single molecule spectroscopy gives insight into the complex photophysics of fluorescence energy transfer (FRET) coupled biosystems** [7190-29]
F. Schleifenbaum, Univ. of Tuebingen (Germany); C. Blum, Univ. of Twente (Netherlands); K. Elgass, S. Peter, Univ. of Tuebingen (Germany); V. Subramaniam, Univ. of Twente (Netherlands); A. J. Meixner, Univ. of Tuebingen (Germany)

FLUORESCENCE LIFETIME PROBES AND METHODS II

- 7190 OW **In vivo optical imaging of dihydroethidium oxidation in the mouse brain employing fluorescence intensity and lifetime contrast** [7190-31]
D. J. Hall, S.-H. Han, L. Dugan, Univ. of California, San Diego (United States)

7190 0X **In vivo phosphorescence imaging of cancer using iridium complexes** [7190-32]
T. Yoshihara, Y. Karasawa, S. Zhang, M. Hosaka, T. Takeuchi, Y. Iida, K. Endo, Gunma Univ. (Japan); T. Imamura, National Institute for Environmental Studies (Japan); S. Tobita, Gunma Univ. (Japan)

7190 0Y **Magnetic field effects on spectrally resolved lifetime of on-line oxygen monitoring using magneto-optic probes** [7190-34]
O. Mermut, P. Gallant, N. Le Bouch, S. Leclair, I. Noiseux, M. Vernon, National Optics Institute (Canada); J.-F. Morin, Univ. Laval (Canada); K. Diamond, M. S. Patterson, McMaster Univ. (Canada); K. Samkoe, B. Pogue, Thayer School of Engineering (United States)

ACTIVATABLE PROBES AND MOLECULAR DETECTION METHODS I

7190 0Z **Activatable optical imaging probes with various fluorophore-quencher combinations** [7190-35]
M. Ogawa, N. Kosaka, National Institutes of Health (United States); Y. Urano, The Univ. of Tokyo (Japan); P. L. Choyke, H. Kobayashi, National Institutes of Health (United States)

7190 10 **A new near-infrared absorption and fluorescent probe based on bombesin for molecular imaging** [7190-36]
N. Kujala, H. Zhai, C. Smith, Univ. of Missouri, Columbia (United States) and Harry S. Truman Memorial Veteran's Hospital (United States); A. Prasanphanich, Univ. of Missouri, Columbia (United States); G. Sieckman, Harry S. Truman Memorial Veteran's Hospital, Univ. of Missouri, Columbia (United States); T. Hoffman, Univ. of Missouri, Columbia (United States) and Harry S. Truman Memorial Veteran's Hospital (United States); W. Volkert, Univ. of Missouri, Columbia (United States); L. Ma, Univ. of Missouri, Columbia (United States) and Harry S. Truman Memorial Veteran's Hospital (United States); P. Yu, Univ. of Missouri, Columbia (United States)

7190 11 **Characterization of quenched fluorescent triple helical peptides for MMP-2 and MMP-9 optical imaging** [7190-37]
P. P. Cheney, Washington Univ. in St. Louis School of Medicine (United States); G. B. Fields, Univ. of Texas at San Antonio Health Science Ctr. (United States); S. Achilefu, W. B. Edwards, Washington Univ. in St. Louis School of Medicine (United States)

ACTIVATABLE PROBES AND MOLECULAR DETECTION METHODS II

7190 13 **Photoactivatable DCDHF fluorophores for single-molecule imaging** [7190-39]
S. J. Lord, N. R. Conley, H. D. Lee, Stanford Univ. (United States); N. Liu, R. Samuel, R. J. Twieg, Kent State Univ. (United States); W. E. Moerner, Stanford Univ. (United States)

7190 14 **Imaging probe for tumor malignancy** [7190-40]
S. Tanaka, Kyoto Univ. (Japan) and Japan Science and Technology Agency (Japan); S. Kizaka-Kondoh, H. Hiraoka, Kyoto Univ. (Japan)

7190 15 **LIBS-based multi-element coded assay for ovarian cancer application** [7190-41]
Y. Markushin, N. Melikechi, A. Marcano O., S. Rock, E. Henderson, Delaware State Univ. (United States); D. Connolly, Fox Chase Cancer Ctr. (United States)

- 7190 16 **A study of optical anisotropy for nearly spherical gold nanoparticles: toward a sensitive detection using polarization microscopy in biomolecular applications** [7190-42]
B. AL-Qadi, S. Toshiharu, Keio Univ. (Japan)

POSTER SESSION

- 7190 17 **Spontaneous transition and concomitant self-assembly of CdTe nanoparticles into CdS nanosheets induced by L-cysteine** [7190-43]
D. Deng, Y. Gu, China Pharmaceutical Univ. (China)
- 7190 19 **Detection of disseminated peritoneal tumors by fluorescein diacrylate in mice** [7190-45]
Y. Harada, H. Furuta, Y. Murayama, P. Dai, Kyoto Prefectural Univ. of Medicine (Japan); Y. Fujikawa, Y. Urano, T. Nagano, The Univ. of Tokyo (Japan); K. Morishita, A. Hasegawa, Olympus Corp. (Japan); T. Takamatsu, Kyoto Prefectural Univ. of Medicine (Japan)
- 7190 1A **Fluorescence in vivo imaging of live tumor cells with pH-activatable targeted probes via receptor-mediated endocytosis** [7190-46]
D. Asanuma, The Univ. of Tokyo (Japan) and CREST/JSPS, Japan Science and Technology Agency (Japan); Y. Urano, The Univ. of Tokyo (Japan) and PRESTO, Japan Science and Technology Agency (Japan); T. Nagano, The Univ. of Tokyo (Japan) and CREST, Japan Science and Technology Agency (Japan); Y. Hama, Y. Koyama, H. Kobayashi, National Institutes of Health (United States)

Author Index

Conference Committee

Symposium Chairs

James G. Fujimoto, Massachusetts Institute of Technology (United States)

R. Rox Anderson, Wellman Center for Photomedicine, Massachusetts General Hospital (United States) and Harvard School of Medicine (United States)

Program Track Chairs

Paras N. Prasad, University at Buffalo (United States)

Dan V. Nicolau, The University of Liverpool (United Kingdom)

Conference Chairs

Samuel Achilefu, Washington University in St. Louis School of Medicine (United States)

Ramesh Raghavachari, U.S. Food and Drug Administration (United States)

Program Committee

Mikhail Berezin, Washington University in St. Louis School of Medicine (United States)

Richard B. Dorshow, Covidien (United States)

Paul M. W. French, Imperial College London (United Kingdom)

Yueqing Gu, China Pharmaceutical University (China)

Hisataka Kobayashi, National Institutes of Health (United States)

Lyle R. Middendorf, LI-COR Biosciences (United States)

Gabor Patonay, Georgia State University (United States)

Yasuteru Urano, The University of Tokyo (Japan)

Session Chairs

- 1 Molecular Imaging and Therapy Strategies I
Samuel Achilefu, Washington University in St. Louis School of Medicine (United States)
- 2 Molecular Imaging and Therapy Strategies II
Hisataka Kobayashi, National Institutes of Health (United States)

- 3 Nanoparticles in Imaging and Therapy I
Mikhail Berezin, Washington University in St. Louis School of Medicine
(United States)
- 4 Nanoparticles in Imaging and Therapy II
Mikhail Berezin, Washington University in St. Louis School of Medicine
(United States)
- 5 Near-Infrared Fluorescent Molecular Probes Design and Synthesis
Ramesh Raghavachari, U.S. Food and Drug Administration (United
States)
- 6 Optical Molecular Probes and Industry
Richard B. Dorshow, Covidien (United States)
- 7 Fluorescence Lifetime Probes and Methods I
Gabor Patonay, Georgia State University (United States)
- 8 Fluorescence Lifetime Probes and Methods II
Yasuteru Urano, The University of Tokyo (Japan)
- 9 Activatable Probes and Molecular Detection Methods I
D. Michael Olive, LI-COR Biosciences (United States)
- 10 Activatable Probes and Molecular Detection Methods II
Hisataka Kobayashi, National Institutes of Health (United States)
