

PROCEEDINGS OF SPIE

Real-Time Image Processing and Deep Learning 2019

**Nasser Kehtarnavaz
Matthias F. Carlsohn**
Editors

**15–16 April 2019
Baltimore, Maryland, United States**

Sponsored and Published by
SPIE

Volume 10996

Proceedings of SPIE 0277-786X, V. 10996

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Real-Time Image Processing and Deep Learning 2019, edited by Nasser Kehtarnavaz,
Matthias F. Carlsohn, Proc. of SPIE Vol. 10996, 1099601 · © 2019 SPIE
CCC code: 0277-786X/19/\$18 · doi: 10.1117/12.2537990

Proc. of SPIE Vol. 10996 1099601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 DEEP LEARNING I

- 10996 02 **A deep learning-based smartphone app for real-time detection of retinal abnormalities in fundus images** [10996-1]
- 10996 04 **No-reference image quality assessment based on deep convolutional neural networks** [10996-3]
- 10996 07 **Computationally efficient training of deep neural networks via transfer learning** [10996-6]

SESSION 2 DEEP LEARNING II

- 10996 08 **Deep learning for impulsive noise removal in color digital images** [10996-7]
- 10996 09 **On data augmentation for segmenting hyperspectral images** [10996-8]
- 10996 0A **Fast multi-modal reuse: co-occurrence pre-trained deep learning models** [10996-9]
- 10996 0B **Deep learning for fast super-resolution reconstruction from multiple images** [10996-10]

SESSION 3 REAL-TIME ALGORITHMS AND SYSTEMS I

- 10996 0C **An efficient algorithm for fast block matching motion estimation using an adaptive threshold scheme** [10996-11]
- 10996 0D **Low-exposure image frame generation algorithms for feature extraction and classification** [10996-12]
- 10996 0E **Parallel image and video self-recovery scheme with high recovery capability** [10996-13]

SESSION 4 DEEP LEARNING III

- 10996 0F **Learning optimal actions with imperfect images** [10996-15]

10996 0G **CNN classification based on global and local features** [10996-17]

SESSION 5 REAL-TIME VIDEO PROCESSING

10996 0I **Kalman-based motion estimation in video surveillance systems for safety applications** [10996-19]

10996 0J **Recent advances in integrated photonic-electronic technologies for high-speed processing and communication circuits for light-based transducers** [10996-20]

SESSION 6 REAL-TIME ALGORITHMS AND SYSTEMS II

10996 0K **Detection of retinal abnormalities using smartphone-captured fundus images: a survey** [10996-21]

10996 0L **Real-time pyramidal Lukas-Kanade tracker performance estimation** [10996-22]

10996 0M **Robust switching technique of impulsive noise removal in color digital images** [10996-23]

10996 0N **Radar real-time image processing for machine perception** [10996-24]

10996 0O **Simultaneous computation of discrete Radon transform quadrants for efficient implementation on real time systems** [10996-14]

POSTER SESSION

10996 0P **Design of neuron-calculators for the normalized equivalence of two matrix arrays based on FPGA for self-learning equivalently convolutional neural networks (SLE_CNNs)** [10996-26]

10996 0Q **Parallel blind semi-fragil color image watermarking based on fast discrete cosine transform** [10996-27]

10996 0R **A robust framework for tamper detection in digital recorded voice signals** [10996-28]

10996 0S **Mobile detection of crop diseases for agricultural yield management** [10996-29]

10996 0T **Ocular diseases diagnosis in fundus images using a deep learning: approaches, tools and performance evaluation** [10996-30]

10996 0U **Visual front-end for underwater scene change detection and environment monitoring by the autonomous drone** [10996-31]

10996 0V **Rock grains segmentation using curvilinear structures based features** [10996-32]

10996 0X **A newly proposed object detection method using faster R-CNN inception with ResNet based on Tensorflow** [10996-34]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Jay Kumler, JENOPTIK Optical Systems, LLC (United States)
Ruth L. Moser, Air Force Research Laboratory (United States)

Symposium Co-chair

John M. Pellegrino, Electro-Optical Systems, Georgia Institute of Technology (United States)

Conference Chairs

Nasser Kehtarnavaz, The University of Texas at Dallas (United States)
Matthias F. Carlsohn, Computer Vision and Image Communication at Bremen (Germany)

Conference Program Committee

Mohamed Akil, ESIEE (France)
Guillermo Botella, University Complutense de Madrid (Spain)
M. Emre Celebi, University of Central Arkansas (United States)
Touradj Ebrahimi, Ecole Polytechnique Fédérale de Lausanne (Switzerland)
Jorge Fernández-Berni, Instituto de Microelectrónica de Sevilla (Spain) and University de Sevilla - CSIC (Spain)
Christos Grecos, Central Washington University (United States)
Ruby Mehrubeoglu, Texas A&M University Corpus Christi (United States)
Volodymyr Ponomaryov, Instituto Politécnico Nacional (Mexico)
Sergio Saponara, Università di Pisa (Italy)
Mukul V. Shirvaikar, The University of Texas at Tyler (United States)
Bogdan Smolka, Silesian University of Technology (Poland)

Session Chairs

- 1 Deep Learning I
Matthias F. Carlsohn, Computer Vision and Image Communication at Bremen (Germany)
- 2 Deep Learning II
Nasser Kehtarnavaz, The University of Texas at Dallas (United States)
- 3 Real-Time Algorithms and Systems I
Bogdan Smolka, Silesian University of Technology (Poland)

- 4 Deep Learning III
Mukul V. Shirvaikar, The University of Texas at Tyler (United States)
- 5 Real-Time Video Processing
Mohamed Akil, ESIEE (France)
- 6 Real-Time Algorithms and Systems II
Sergio Saponara, Università degli Studi di Pisa (Italy)
