SPIE

Volume 11386

Proceedings of SPIE 0277-786X, V. 11386

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Advanced Photon Counting Techniques XIV, edited by Mark A. Itzler, Joshua C. Bienfang,
K. Alex McIntosh, Proc. of SPIE Vol. 11386, 1138601 · © 2020 SPIE
CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2572710

Proc. of SPIE Vol. 11386 1138601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advanced Photon Counting Techniques XIV*, edited by Mark A. Itzler, Joshua C. Bienfang, K. Alex McIntosh, Proceedings of SPIE Vol. 11386 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

PHOTON COUNTING INSTRUMENTATION

- 11386 05 Improved FPGA time-to-digital converter architecture to improve precision, converter linearity and reduce dead-time [11386-3]

SEMICONDUCTOR SINGLE-PHOTON DETECTORS

- 11386 06 Photon counting with resonant tunneling diodes: overview and recent developments (Invited Paper) [11386-5]

PHOTON COUNTING APPLICATIONS I

- 11386 0B Computational single photon counting for non-line-of-sight, light in flight, and photon flux imaging (Invited Paper) [11386-11]
- 11386 0C Efficient non-line-of-sight imaging with computational single-photon imaging (Invited Paper) [11386-12]
- 11386 0D Terahertz photon counting: large-format SPAD arrays for lidar remote sensing of the atmosphere and ocean from space (Invited Paper) [11386-13]

SINGLE-PHOTON AVALANCHE DIODES

- 11386 0N High efficiency planar geometry germanium-on-silicon single-photon avalanche diode detectors (Invited Paper) [11386-25]
- 11386 0O Beyond pile-up limitation in time-correlated single photon counting measurement with high-speed and low-distortion electronics [11386-26]

SUPERCONDUCTING NANOWIRE SPD ARRAYS

- 11386 0Q Development of superconducting nanowire single-photon detector arrays for applications in SIMIT (Invited Paper) [11386-28]
