BARSC—British Association of Remote Sensing (United Kingdom)
EARSeL—European Association of Remote Sensing Laboratories (Germany)
ISPRS—International Society for Photogrammetry and Remote Sensing

Published by
SPIE

Volume 11528

Proceedings of SPIE 0277-786X, V. 11528

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Remote Sensing for Agriculture, Ecosystems, and Hydrology XXII, edited by Christopher M. U. Neale,
Antonino Maltese, Proc. of SPIE Vol. 11528, 1152801 · © 2020 SPIE
CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2584634

Proc. of SPIE Vol. 11528 1152801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Remote Sensing for Agriculture, Ecosystems, and Hydrology XXII*, edited by Christopher M. U. Neale, Antonino Maltese, Proceedings of SPIE Vol. 11528 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

SENTINEL-2

- 11528 04 **Application of geospatial technology for high-resolution mapping and monitoring of crop patterns in support of crop insurance for the rain-fed regions of India [11528-1]**
- 11528 06 **Application of principal component analysis to remote sensing data for deforestation monitoring [11528-3]**
- 11528 07 **Monitoring of soil moisture in the south of Ukraine using active and passive remote sensing data [11528-4]**

PRECISION FARMING

- 11528 08 **Temporal analysis of the vineyard phenology from remote sensing data using Google Earth engine [11528-5]**
- 11528 09 **Farmland segmentation from remote sensing images using deep learning methods [11528-6]**
- 11528 0A **Initial evaluation of enriching satellite imagery using sparse proximal sensing in precision farming [11528-7]**
- 11528 0B **Predictive modelling of wheat yield from vegetation index time series in Spain: assessing the use of Corine Land Cover and CAP statistics to obtain crop masks [11528-8]**
- 11528 0C **An integrated service-based solution addressing the modernised common agriculture policy regulations and environmental perspectives [11528-9]**

HYDROLOGY

- 11528 0E **Flash flood susceptibility modeling for drainage basins of Dir Lower Khyber-Pakhtunkhwa: a comparative analysis of morphometric ranking and El-Shamy's approach [11528-11]**
- 11528 0J **Modelling reservoir turbidity from medium resolution Sentinel-2A/MSI and Landsat-8/OLI satellite imagery [11528-37]**

VEGETATION MONITORING

- 11528 0K **Vegetation phenology dynamics across ecoregions of Iberian Peninsula from MODIS NDVI time series: 2001-2017 [11528-16]**

- 11528 OL Emissivity-based vegetation indices to monitor deforestation and forest degradation in the Congo basin rainforest [11528-17]
- 11528 OM Detecting leaf phosphorus content in arbuscular mycorrhizal fungi-inoculated soybean using hyperspectral remote sensing data [11528-18]

ECOSYSTEM AND ENVIRONMENTAL CHANGES

- 11528 OO An approach for forewarning forest fires in Shivalik forest tracts of Uttarakhand by application of fire trends and Keetch Byram Drought Index [11528-20]
- 11528 OQ Meteorological data outlier detection: a principal component approach [11528-22]

CLASSIFICATION

- 11528 OV Investigating potato production in the future by the EU-28 countries using sentinels and EU open datasets [11528-27]
- 11528 OW Fluorescence spectral shape analysis for fast COVID-19 virus identification: machine learning approach [11528-40]

POSTER SESSION

- 11528 OX Ensuring the quality of aviation spraying of agricultural aircraft with wind-powered drive [11528-28]
- 11528 OY Monitoring the dynamics of phenological development of winter wheat using orthogonalization of multispectral satellite data [11528-29]
- 11528 13 Extracting knowledge from aerial photos based on the method of automated processing [11528-34]
- 11528 14 Application of intelligent technologies for getting information about the state of natural resources when monitoring the ecosystems of the northern territories [11528-35]
