SPIE

Volume 11686

Proceedings of SPIE 0277-786X, V. 11686

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Gallium Nitride Materials and Devices XVI, edited by Hiroshi Fujioka, Hadis Morkoç
Ulrich T. Schwarz, Proc. of SPIE Vol. 11686, 1168601 · © 2021 SPIE
CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2596734

Proc. of SPIE Vol. 11686 1168601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Gallium Nitride Materials and Devices XVI*, edited by Hiroshi Fujioka, Hadis Morkoç, Ulrich T. Schwarz, Proceedings of SPIE Vol. 11686 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

VERTICAL-CAVITY SURFACE-EMITTING LASERS (VCSELS)

- 11686 OE **Blue and green GaN-based vertical-cavity surface-emitting lasers with AlInN/GaN DBR (Invited Paper)** [11686-1]
- 11686 OI **Development of highly reflective mirrors for III-nitrides from green to UV (Invited Paper)** [11686-5]

IN-PLANE LASER DIODES

- 11686 OK **Dynamical behavior of blue broad-area laser diodes (Invited Paper)** [11686-7]
- 11686 OM **New fabrication method of InGaN laser diode by epitaxial lateral overgrowth and cleavable technique from free-standing non- and semi-polar GaN substrate (Invited Paper)** [11686-9]
- 11686 ON **Assessment of a sub-MHz linewidth fiber Bragg grating external-cavity InGaN laser diode** [11686-10]
- 11686 OO **Hysteresis in IV-curve of blue multifunction laser diodes due to photon and carrier density changes** [11686-11]

UV LASER DIODES

- 11686 OP **Development of UV-C laser diodes on AlN substrate (Invited Paper)** [11686-12]
- 11686 OS **Development of AlGaIn/GaN heterostructures for e-beam pumped UV lasers** [11686-15]

UV LEDs

- 11686 OT **DUV LEDs based on AlGaIn quantum dots (Invited Paper)** [11686-16]
- 11686 IO **Highly efficient transverse-electric-dominant ultraviolet-C emitters employing GaN multiple quantum disks in AlN nanowire matrix** [11686-23]
- 11686 II **Decrease in the injection efficiency and generation of midgap states in UV-C LEDs: a model based on rate equations** [11686-24]

NOVEL DEVICES AND MICRO-/NANOSTRUCTURES

- 11686 14 **Demonstration of uniform 6x6 GaN p-i-n UV avalanche photodiode arrays (Invited Paper)** [11686-27]
- 11686 1A **Device fabrication for multiple quantum shell nanowires based laser diodes** [11686-33]

EPITAXY AND BULK GROWTH

- 11686 1N **Morphological improvement and elimination of V-pits from long-wavelength all-InGaN based μ LEDs grown by MOCVD on compliant substrates** [11686-46]

FUNDAMENTAL PHYSICS AND CHARACTERIZATION I

- 11686 1V **Mapping tensorial shear stress with light-emitting GaN nanopillars** [11686-54]
- 11686 1X **How does an In-containing underlayer prevent the propagation of defects in InGaN QW LEDs? identification of SRH centers and modeling of trap profile** [11686-56]

FUNDAMENTAL PHYSICS AND CHARACTERIZATION II

- 11686 1Y **Analysis of LO phonon properties in III-nitrides: interaction with carriers and microscopic analysis (Invited Paper)** [11686-57]

GAN ELECTRONICS AND HEMTS

- 11686 28 **HfSiO_x-gate GaN MOS-HEMTs for RF power transistor (Invited Paper)** [11686-67]
- 11686 2A **Out-diffusion of Pd as part of degradation mechanisms in RF AlGaIn-GaN HEMTs with Ni-Pd-Au Schottky contacts: part II** [11686-69]

POSTER SESSION

- 11686 2C **Electronic surface and heterostructure: band offsets in ternary wurtzite and zincblende III-nitrides** [11686-71]
- 11686 2O **Optics-free ultrathin-film spectrometers based on GaN light absorbers** [11686-83]
