Volume 11901

Proceedings of SPIE 0277-786X, V. 11901

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Advanced Sensor Systems and Applications XI, edited by Zuyuan He,
Gang-Ding Peng, Proc. of SPIE Vol. 11901, 1190101 · © 2021 SPIE
CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2619266

Proc. of SPIE Vol. 11901 1190101-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Advanced Sensor Systems and Applications XI*, edited by Zuyuan He, Gang-Ding Peng, Proc. of SPIE 11901, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

BIOLOGICAL AND CHEMICAL SENSORS I

- 11901 02 **Cryogenic temperature sensor based on an optical fiber Fabry-Perot interferometer with high sensitivity (Invited Paper)** [11901-1]
- 11901 03 **Fiber-laser-enhanced WGM microtubule cavity for myocardial infarction biomarker detection** [11901-2]
- 11901 04 **Feasibility assessment of an optical sensor for long-term electrocardiogram monitoring** [11901-5]

MECHANICAL AND ELECTRICAL SENSORS

- 11901 05 **Analysis of fabrication error and optimization technique of $\lambda/4$ waveplate for fiber optical current transformer (Invited Paper)** [11901-6]
- 11901 06 **Design and simulation analysis of fiber optic current sensor using orbital angular momentum beam** [11901-7]
- 11901 07 **Research on the Shupe effect error caused by asymmetry of the dual 90-degree rotation splices in the resonator of the resonant fiber optic gyroscope** [11901-8]
- 11901 08 **A sensitivity-enhanced all-fiber Fabry-Perot high-pressure sensor with a hard-core diaphragm** [11901-9]
- 11901 09 **Methods for measuring angular velocity based on the use of optical parity-time-symmetry systems** [11901-10]

MICROSTRUCTURE SENSORS AND SPECIALTY FIBERS

- 11901 0B **Fiber-optic airflow sensor for air quantity estimation in air conduit** [11901-14]
- 11901 0C **High sensitivity distributed static strain sensing based on all grating optical fiber in optical frequency domain reflectometry** [11901-15]

BIOLOGICAL AND CHEMICAL SENSORS II

- 11901 0D **Highly sensitive temperature sensor with optomechanofluidic resonators (Invited Paper)** [11901-16]

- 11901 OF **Optical fiber probe for CARS spectroscopy** [11901-18]
- 11901 OG **Simultaneous measurement of refractive index and temperature based on bent core-offset in-line fiber Mach-Zehnder interferometer** [11901-19]
- 11901 OH **Broad-range self-sweeping Ho-doped fiber laser for N₂O spectroscopy tasks** [11901-20]

NEW SENSOR DEVICES AND SYSTEMS

- 11901 OI **Semiconductor optical amplifier fiber-ring laser for FBG dynamic strain sensing with an adaptive two-wave mixing demodulator** [11901-21]
- 11901 OK **Bandwidth evaluation of 11 cm-long polymer waveguides based on optical sampling technique** [11901-23]
- 11901 OL **Changes in speckle patterns in an output light spot from an optical fiber to be caused by load application of small weight level (Invited Paper)** [11901-24]
- 11901 OM **Automatic control of the tuning parameters of a self-sweeping Tm-doped fiber laser** [11901-25]

NEW SENSOR TECHNIQUES AND APPLICATIONS

- 11901 ON **Ultrasonic optical fiber sensing for composite structural health monitoring (Invited Paper)** [11901-26]
- 11901 OO **Measurement of linewidth enhancement factor based on self-mixing interferometry and back propagation neural network** [11901-27]
- 11901 OP **Sensing interrogation system with Michelson interferometer incorporating an optoelectronic oscillator** [11901-28]
- 11901 OQ **Orthogonal phase demodulation system with wide frequency band response based on birefringent crystals and polarization technology** [11901-29]
- 11901 OR **Dynamic speckle analysis using the event-based block matching algorithm** [11901-30]

POSTER SESSION

- 11901 OS **Analytical solutions for polarization mode dispersion and decorrelation in optical fibers with weak random varying birefringence** [11901-13]
- 11901 OT **A fiber-optic sensing system based on broadband light source carried microwave interferometry** [11901-31]

- 11901 0U **Study of a liquid level sensor based on a tilted long period grating imprinted on a plastic optical fiber** [11901-32]
- 11901 0V **Investigating the properties of self-standing nickel-mesh decorated with Au nanoparticles for flexible transparent H₂O₂ sensor** [11901-35]
- 11901 0W **Solutions on multiple configuration sensing systems** [11901-36]
- 11901 0Y **Detection of SO₂F₂ concentration of SF₆ decomposition product in GIS gas chamber based on ICL-TDLAS** [11901-38]
- 11901 11 **Sensitivity analysis of fault detection for few-mode fiber links based on Rayleigh backscattering** [11901-41]
- 11901 13 **Measurement of damping vibration using self-mixing interferometry under strong feedback regime** [11901-43]
- 11901 15 **A distributed optical fiber temperature measuring system for oil wells** [11901-45]
- 11901 16 **Magnetic field sensor based on Terfenol-D coated optical fibers** [11901-46]
- 11901 17 **Characteristics of partially coherent laser field backscattered by atmospheric aerosols** [11901-48]
- 11901 18 **Suppressing interference fading in Φ -OTDR with intensity-coded pulse based on spectrum-extraction and rotated-vector-sum method** [11901-49]
