

PROCEEDINGS OF SPIE

# ***Nonlinear Frequency Generation and Conversion: Materials and Devices XXIII***

**Peter G. Schunemann**  
*Editor*

**29–31 January 2024**  
**San Francisco, California, United States**

*Sponsored and Published by*  
SPIE

**Volume 12869**

Proceedings of SPIE 0277-786X, V. 12869

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Nonlinear Frequency Generation and Conversion: Materials and Devices XXIII,  
edited by Peter G. Schunemann, Proc. of SPIE Vol. 12869, 1286901  
© 2024 SPIE · 0277-786X · doi: 10.1117/12.3029980

Proc. of SPIE Vol. 12869 1286901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:  
Author(s), "Title of Paper," in *Nonlinear Frequency Generation and Conversion: Materials and Devices XXIII*, edited by Peter G. Schunemann, Proc. of SPIE 12869, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

---

## **SESSION 1      FREQUENCY COMBS AND SPECTROSCOPY**

---

- 12869 02      **Electro-optically sampled broadband dual-comb spectroscopy across mid-IR to terahertz (6.6–200  $\mu\text{m}$ ) spectral range** [12869-2]
- 12869 03      **Exploring frequency comb generation in optically injected ring quantum cascade lasers** [12869-6]

---

## **SESSION 2      OPTICAL PARAMETRIC DEVICES AND APPLICATIONS I**

---

- 12869 04      **Non-cyclic geometric phase-induced output coupler for optimum out-couple power in optical parametric oscillators** [12869-8]

---

## **SESSION 3      INFRARED GENERATION**

---

- 12869 05      **12.2 W ZGP OPO pumped by a Q-Switched  $\text{Tm}^{3+}:\text{Ho}^{3+}$ -codoped fiber laser** [12869-13]
- 12869 06      **14 W linear ZGP OPO pumped by a Q-switched  $\text{Ho}^{3+}:\text{YAG}$  laser with a maximum energy of 2.2 mJ** [12869-14]

---

## **SESSION 4      NONLINEAR WAVEGUIDE DEVICES I**

---

- 12869 07      **Visible and near-IR entangled photon generation and UV second harmonic generation with lithium niobate nanophotonic waveguides for on-chip spectroscopy (Invited Paper)** [12869-16]
- 12869 08      **High-power microlaser sources in the green spectral range with single-mode fiber output** [12869-18]
- 12869 09      **Single PPLN SHG waveguide for full C band tuning range with watt level output through the engineered QPM structure** [12869-19]

---

## **SESSION 5      NONLINEAR WAVEGUIDE DEVICES II**

---

- 12869 0A      **Fifteen years of nonlinear semiconductor optical fibers: a review of past, present, and future (Invited Paper)** [12869-21]

12869 0B **Ultraefficient on-chip supercontinuum generation: bringing handheld sensing devices within reach** [12869-23]

---

**SESSION 6 NEW NONLINEAR MATERIALS I**

---

12869 0C **Orientation-patterned gallium phosphide OPO developments for long-wave infrared lidar applications** [12869-27]

---

**SESSION 7 NEW NONLINEAR MATERIALS II**

---

12869 0D **Post-2000 progress in nonlinear optics: tabulating new materials and best practices (Invited Paper)** [12869-30]

12869 0E **Second-harmonic generation of a CO<sub>2</sub> laser at 10.7186–9.2714 μm in AgGa<sub>1-x</sub>In<sub>x</sub>Se<sub>2</sub>** [12869-33]

---

**SESSION 8 RAMAN LASERS AND SUPERCONTINUUM SOURCES**

---

12869 0F **Yellow laser based on the inhibited-coupling hollow-core photonic crystal fibre technology** [12869-34]

12869 0G **High energy and high conversion efficiency Tm-based /KGW Raman laser in the SWIR spectral range** [12869-35]

12869 0H **Widely tunable visible pulsed cascaded Raman fiber laser source** [12869-36]

---

**SESSION 9 VISIBLE-UV GENERATION**

---

12869 0I **45 W average-power, high-energy deep-UV generation at 257 nm in LBO (Invited Paper)** [12869-40]

12869 0J **Tens of milliwatts CW 213 nm generation for photoemission spectroscopy** [12869-41]

12869 0K **Multiwatt red nanosecond frequency-doubled Raman-shifted fiber laser** [12869-42]

12869 0L **Ultraviolet beam pattern control in second and third harmonic generation by spatial wavefront modulation of near-infrared driving wavelength** [12869-43]

**SESSION 10    NEW CONCEPTS IN NONLINEAR OPTICS**

---

- 12869 0M    **Parameter dependencies in multicycle THz generation with tunable high-energy pulse trains in large-aperture crystals** [12869-44]
- 12869 0N    **Efficient measurement of spatial mode entanglement with stimulated emission tomography** [12869-45]
- 12869 0O    **Spatial Hadamard encoding with difference frequency generation** [12869-46]

**SESSION 11    OPTICAL PARAMETRIC DEVICES AND APPLICATIONS II**

---

- 12869 0P    **Advancements in high-flux high-harmonic generation: harnessing advanced nonlinear laser technologies (Invited Paper)** [12869-50]

**POSTER SESSION**

---

- 12869 0Q    **High efficiency frequency conversion based on cascaded processes under large phase mismatching between some interacting pulses** [12869-56]

# Conference Committee

## *Symposium Chairs*

**Stefan Kaierle**, Laser Zentrum Hannover e.V. (Germany)  
**John Ballato**, Clemson University (United States)

## *Symposium Co-chairs*

**Vassilia Zorba**, Lawrence Berkeley National Laboratory  
(United States)  
**Kaoru Minoshima**, University of Electro-Communications (Japan)

## *Program Track Chairs*

**Vladimir Ilchenko**, Jet Propulsion Laboratory (United States)  
**Paul O. Leisher**, Luminar Technologies, Inc. (United States)

## *Conference Chair*

**Peter G. Schunemann**, onsemi (United States)

## *Conference Program Committee*

**Carlota Canalias**, Tailored Photons AB (Sweden)  
**Shekhar Guha**, Air Force Research Laboratory (United States)  
**Christelle Kieleck**, Fraunhofer-Institut für Optronik, Systemtechnik, und  
Bildauswertung IOSB (Germany)  
**Kentaro Miyata**, RIKEN Center for Advanced Photonics (Japan)  
**Rita D. Peterson**, Air Force Research Laboratory (United States)  
**Valentin Petrov**, Max-Born-Institut für Nichtlineare Optik und  
Kurzeitspektroskopie (Germany)  
**Christopher R. Phillips**, ETH Zurich (Switzerland)  
**Kenneth L. Schepler**, CREOL, University of Central Florida  
(United States)  
**Chaitanya Kumar Suddapalli**, Tata Institute of Fundamental Research  
(India)  
**Konstantin L. Vodopyanov**, CREOL, University of Central Florida  
(United States)  
**Vladislav V. Yakovlev**, Texas A&M University (United States)  
**Haohai Yu**, Shandong University (China)
