

PROCEEDINGS OF SPIE

Laser Resonators, Microresonators, and Beam Control XXVI

Vladimir S. Ilchenko
Andrea M. Armani
Julia V. Sheldakova
Editors

30 January – 1 February 2024
San Francisco, California, United States

Sponsored and Published by
SPIE

Volume 12871

Proceedings of SPIE 0277-786X, V. 12871

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Laser Resonators, Microresonators, and Beam Control XXVI, edited by Vladimir S. Ilchenko,
Andrea M. Armani, Julia V. Sheldakova, Proc. of SPIE Vol. 12871, 1287101
© 2024 SPIE · 0277-786X · doi: 10.1117/12.3029982

Proc. of SPIE Vol. 12871 1287101-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Laser Resonators, Microresonators, and Beam Control XXVI*, edited by Vladimir S. Ilchenko, Andrea M. Armani, Julia V. Sheldakova, Proc. of SPIE 12871, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 MICROCOMB GENERAL USING MICRORESONATORS

12871 02 **UV, visible, and near-infrared light generation through cascaded nonlinear processes in silicon-nitride microring resonators pumped at telecom wavelength** [12871-3]

SESSION 2 SOLITON GENERATION WITH MICRORESONATORS

12871 03 **Transitional dynamics of collapsed snaking to multiple resonances in Kerr cavities with parabolic potential: dark and bright solitons** [12871-7]

SESSION 3 MICRORESONATORS I

12871 04 **Adiabatic frequency conversion in a lithium niobate microresonator for FMCW-LiDAR** [12871-12]

12871 05 **Advances in quantum microcombs** [12871-13]

SESSION 4 MICRORESONATORS II

12871 06 **Solid and liquid whispering-gallery mode microresonators excited via Lorenz-Mie scattering and their applications (Invited Paper)** [12871-18]

SESSION 5 MICRORESONATOR STABILIZATION

12871 07 **Optimized encoding for coherent communication using photonic crystal cavity IQ modulators in thin film lithium niobate (Invited Paper)** [12871-19]

12871 08 **Design of an FPGA-based PID controller with high-bandwidth and auto-relocking features: application to Sub-kHz external cavity diode lasers** [12871-20]

12871 09 **Mitigation of thermal instabilities in Kerr microcombs** [12871-22]

SESSION 6 LASER BEAM CONTROL

- 12871 0A **Steerable diverging angular dispersion beam for wireless optical power transfer** [12871-23]
- 12871 0B **Compact, high power laser beam CMOS profiler with less than -8 inherent optical density** [12871-24]
- 12871 0C **100 hrs endurance test of a DUV laser beam delivery via a hollow-core photonic crystal fiber patchcord** [12871-25]
- 12871 0D **Efficient multibeam generation in square lattices using SMF-SCF structure** [12871-26]
- 12871 0E **Nonlinear beam control via amplitude and phase locking in multimode GRIN fibers** [12871-27]

SESSION 7 LASER BEAM SHAPING I

- 12871 0F **Machine learning method to measure the transmission matrix of a multimode optical fiber without reference beam for 3D beam tailoring** [12871-31]
- 12871 0G **Thermal effects and shockwave formation due to filaments in air** [12871-32]

SESSION 8 LASER BEAM SHAPING II

- 12871 0H **Wave thermalization sets high-power limitation to spatial beam self-cleaning in multimode optical fibers** [12871-35]
- 12871 0I **Acousto-optic modulation of GW-scale beams in ambient air** [12871-36]
- 12871 0J **3D printed push fit board for a two-photon dichroic atomic vapor laser lock** [12871-37]

DIGITAL POSTER SESSION

- 12871 0K **Atmospheric turbulence generator: software and hardware implementation of Kolmogorov phase screen simulation system** [12871-45]
- 12871 0L **Wide-aperture multichannel Shack-Hartmann sensor for multispectral wavefront measurements** [12871-46]
- 12871 0M **Thermomechanical behavior of stacked-actuator deformable mirrors under incident high-power laser radiation** [12871-48]
- 12871 0N **Beam-path alignment system for high-power laser setups** [12871-49]

Conference Committee

Symposium Chairs

Stefan Kaierle, Laser Zentrum Hannover e.V. (Germany)
John Ballato, Clemson University (United States)

Symposium Co-chairs

Vassilia Zorba, Lawrence Berkeley National Laboratory
(United States)
Kaoru Minoshima, University of Electro-Communications (Japan)

Program Track Chairs

Vladimir Ilchenko, Jet Propulsion Laboratory (United States)
Paul O. Leisher, Luminar Technologies, Inc. (United States)

Conference Chairs

Vladimir S. Ilchenko, Jet Propulsion Laboratory (United States)
Andrea M. Armani, The University of Southern California
(United States)
Julia V. Sheldakova, AKA Optics SAS (France)

Conference Co-chair

Alexis V. Kudryashov, Institute of Dynamics of Geospheres RAS
(Russian Federation)

Conference Program Committee

Victor Brasch, CSEM SA (Switzerland)
David Burghoff, University of Notre Dame (United States)
Yanne K. Chembo, Institute for Research in Electronics and Applied
Physics (United States) and University of Maryland, College Park
(United States)
Francesco Dell'Olio, Politecnico di Bari (Italy)
Jean-Claude M. Diels, The University of New Mexico (United States)
Avik Dutt, University of Maryland, College Park (United States)
Andrew Forbes, University of the Witwatersrand, Johannesburg
(South Africa)
Stefan Hambücker, INGENERIC GmbH (Germany)
Tobias J. Kippenberg, Ecole Polytechnique Fédérale de Lausanne
(Switzerland)

James R. Leger, University of Minnesota, Twin Cities (United States)
Andrey B. Matsko, Jet Propulsion Laboratory (United States)
Gregory Moille, University of Maryland, College Park (United States)
Gualtiero Nunzi Conti, Istituto di Fisica Applicata "Nello Carrara" (Italy)
Marco Piccardo, Harvard John A. Paulson School of Engineering and Applied Sciences (United States)
Nicolás Quesada, Polytechnique Montréal (Canada)
Michael J. Scaggs, Haas Laser Technologies, Inc. (United States)
Harald G. L. Schwefel, University of Otago (New Zealand)
Haiyin Sun, Special Optics (United States)
Hossein Taheri, University of California, Riverside (United States)
Kai Wang, McGill University (Canada)
Jonathan M. Ward, Okinawa Institute of Science and Technology Graduate University (Japan)
