SPIE

Volume 8273

Proceedings of SPIE, 0277-786X, v. 8273

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Advances in Slow and Fast Light V*, edited by Selim M. Shahriar, Frank A. Narducci, Proceedings of SPIE Vol. 8273 (SPIE, Bellingham, WA, 2012) Article CID Number.

ISSN 0277-786X
ISBN 9780819489166

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

The logo for SPIE Digital Library features the word "SPIE" in a bold, sans-serif font above the words "Digital Library" in a similar font. To the right of the text is a stylized graphic consisting of three vertical bars of increasing height, resembling a bar chart or a signal waveform.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii *Conference Committee*

SLOW AND FAST LIGHT IN RESONANT SYSTEMS

- 8273 04 **Slow light enhancement of four-wave mixing in coupled silicon-on-insulator microrings (Invited Paper)** [8273-03]
J. R. Ong, Univ. of California, San Diego (United States); W. M. J. Green, S. Assefa, F. Xia, IBM Thomas J. Watson Research Ctr. (United States); S. Mookherjea, Univ. of California, San Diego (United States)
- 8273 05 **Dynamical trapping of light in coupled laser arrays: slow or fast?** [8273-04]
Y. Yifat, Tel Aviv Univ. (Israel); C. Long, Swiss Federal Institute of Technology Lausanne (Switzerland); J. Scheuer, Tel Aviv Univ. (Israel); E. Kapon, Swiss Federal Institute of Technology Lausanne (Switzerland)

SLOW AND FAST LIGHT IN ATOMIC VAPOR

- 8273 07 **Slow and stored light with atom-based squeezed light (Invited Paper)** [8273-06]
G. Romanov, T. Horrom, E. E. Mikhailov, I. Novikova, The College of William and Mary (United States)

SLOW AND FAST LIGHT USING SOA , SBS, AND NLO

- 8273 0C **Variable delay using stationary and localized Brillouin dynamic gratings (Invited Paper)** [8273-11]
Y. Antman, Bar-Ilan Univ. (Israel); N. Primerov, J. Sancho, L. Thévenaz, Ecole Polytechnique Fédérale de Lausanne (Switzerland); A. Zadok, Bar-Ilan Univ. (Israel)
- 8273 0D **A Brillouin gain based fast light fiber laser for sensing applications (Invited Paper)** [8273-12]
J. Scheuer, Tel Aviv Univ. (Israel); S. Shahriar, Northwestern Univ. (United States)
- 8273 0E **Detecting rotation using wave mixing in an ultra-dispersive medium (Invited Paper)** [8273-13]
Y. Rostovtsev, Univ. of North Texas (United States)

SLOW AND FAST LIGHT IN SPECTRAL HOLE BURNING MEDIA AND NANOFIBER

- 8273 0H **Increasing the scale factor of a ring laser gyro via spectral hole burning (Invited Paper)** [8273-15]
M. Salit, K. Salit, P. E. Bauhahn, Honeywell Aerospace Advanced Technology (United States)

SLOW AND FAST LIGHT USING PHOTONIC CRYSTAL STRUCTURES

- 8273 0L **Slow-light in photonic crystal waveguides/fibers: dispersion tailoring schemes for obtaining a high group index with wide band and low GVD (Invited Paper)** [8273-20]
L. Ren, J. Liang, Y. Liu, H. Ju, Xi'an Institute of Optics and Precision Mechanics (China); M. Yun, Qingdao Univ. (China); C. Ma, X. Han, X. Lin, Xi'an Institute of Optics and Precision Mechanics (China); Y. Tomita, The Univ. of Electro-Communications (Japan)
- 8273 0O **Progress in hollow core photonic crystal fiber for atomic vapour based coherent optics (Invited Paper)** [8273-23]
T. D. Bradley, Y. Y. Wang, M. Alharbi, Univ. of Bath (United Kingdom) and XLim Research institute, CNRS, Univ. of Limoges (France); C. Fourcade Dutin, B. J. Mangan, N. V. Wheeler, Univ. of Bath (United Kingdom); F. Benabid, Univ. of Bath (United Kingdom) and XLim Research institute, CNRS, Univ. of Limoges (France)

SENSORS USING SLOW AND FAST LIGHT I

- 8273 0R **Dispersion in a four level N-scheme atomic system with co- and counter- propagating beams (Invited Paper)** [8273-26]
J. P. Davis, F. A. Narducci, Naval Air Systems Command (United States)
- 8273 0S **Effect of inhomogeneous broadening on a DPAL based superluminal laser for precision sensing (Invited Paper)** [8273-27]
T. Y. Abi-Salloum, Widener Univ. (United States); J. Yablon, S. Tseng, S. M. Shahriar, Northwestern Univ. (United States)
- 8273 0T **Tuning the sensitivity of an optical cavity with slow and fast light (Invited Paper)** [8273-28]
D. D. Smith, NASA Marshall Space Flight Ctr. (United States); K. Myneni, U.S. Army RDECOM (United States); H. Chang, ERC Inc. (United States); A. Toftul, Univ. of Nebraska Lincoln (United States); C. Schambeau, Univ. of Alabama in Huntsville (United States); J. A. Odutola, Alabama A&M Univ. (United States); J. C. Diels, Univ. of New Mexico (United States)

SENSORS USING SLOW AND FAST LIGHT II

- 8273 0V **Slow-light through wave-mixing in liquid crystal light-valves and interferometric applications (Invited Paper)** [8273-30]
S. Residori, U. Bortolozzo, INLN, CNRS, Univ. de Nice-Sophia Antipolis (France); J. P. Huignard, Jphopto (France)
- 8273 0W **Slow light in fiber sensors (Invited Paper)** [8273-31]
M. J. F. Digonnet, H. Wen, M. A. Terrel, S. Fan, Stanford Univ. (United States)
- 8273 0X **Improved spectral performance of Fourier transform interferometer utilizing slow light medium (Invited Paper)** [8273-32]
Y. Zhang, Y. Cai, C. Yu, J. Li, P. Yuan, Harbin Institute of Technology (China)

THEORETICAL STUDIES IN SLOW AND FAST LIGHT

- 8273 0Z **Microscopic and macroscopic descriptions of electromagnetic-field propagation in nonlinear dispersive and absorbing media (Invited Paper)** [8273-34]
V. L. Jacobs, U.S. Naval Research Lab. (United States)
- 8273 10 **Kerr effect in structured superluminal media (Invited Paper)** [8273-35]
X. Angulo-Vinuesa, Univ. de Alcalá (Spain) and Consejo Superior de Investigaciones Científicas (Spain); S. Martin-Lopez, Consejo Superior de Investigaciones Científicas (Spain); C. Caucheteur, D. Kinet, M. Wuilpart, Univ. de Mons (Belgium); A. Denisov, S. H. Chin, L. Thévenaz, Ecole Polytechnique Fédérale de Lausanne (Switzerland); M. Gonzalez-Herraez, Univ. de Alcalá (Spain)

SLOW AND FAST LIGHT FOR OPTICAL COMMUNICATION, OPTOMECHANICS, AND MICROWAVE PHOTONICS

- 8273 17 **Slow-light enhanced optomechanical interactions (Invited Paper)** [8273-42]
A. A. Sukhorukov, Y. Sun, T. P. White, Australian National Univ. (Australia)

NEW DIRECTIONS IN SLOW AND FAST LIGHT I

- 8273 19 **Recent progress in on-chip slow light devices (Invited Paper)** [8273-45]
T. Baba, Yokohama National Univ. (Japan) and CREST, Japan Science and Technology Agency (Japan)
- 8273 1A **Slow-light enhancement of spontaneous emission in active photonic crystal waveguides (Invited Paper)** [8273-44]
S. Ek, Y. Chen, E. Semanova, P. Lunnemann Hansen, K. Yvind, J. Mørk, DTU-Fotonik (Denmark)

NEW DIRECTIONS IN SLOW AND FAST LIGHT II

- 8273 1D **Enhancing the light-matter interaction using slow light: towards the concept of dense light (Invited Paper)** [8273-48]
L. Thévenaz, I. Dicaire, S.-H. Chin, École Polytechnique Fédérale de Lausanne (Switzerland)
- 8273 1F **Slow light and broadband coherent phonon generation (Invited Paper)** [8273-50]
Z. Wang, The Univ. of Texas at Austin (United States) and Massachusetts Institute of Technology (United States); P. Rakich, C. Reinke, R. Camacho, P. Davids, Sandia National Labs. (United States)

Author Index

Conference Committee

Symposium Chair

Klaus P. Streubel, OSRAM GmbH (Germany)

Symposium Cochairs

David L. Andrews, University of East Anglia Norwich (United Kingdom)

Liang-Chy Chien, Kent State University (United States)

Program Track Chair

Zameer U. Hasan, Temple University (United States)

Conference Chairs

Selim M. Shahriar, Northwestern University (United States)

Frank A. Narducci, Naval Air Systems Command (United States)

Program Committee

Tony Abi-Salloum, Widener University (United States)

Shanhui Fan, Stanford University (United States)

Daniel J. Gauthier, Duke University (United States)

Kohzo Hakuta, The University of Electro-Communications (Japan)

Ortwin Hess, Imperial College London (United Kingdom)

John C. Howell, University of Rochester (United States)

Jacob B. Khurgin, The Johns Hopkins University (United States)

Uriel Levy, The Hebrew University of Jerusalem (Israel)

Gour S. Pati, Delaware State University (United States)

Jacob Scheuer, Tel Aviv University (Israel)

Session Chairs

- 1 Slow and Fast Light in Resonant Systems
Uriel Levy, The Hebrew University of Jerusalem (Israel)
- 2 Slow and Fast Light in Atomic Vapor
Jacob Scheuer, Tel Aviv University (Israel)
- 3 Slow and Fast Light Using SOA, SBS, and NLO
Mary Salit, Honeywell Aerospace (United States)

- 4 Slow and Fast Light in Spectral Hole Burning Media and Nanofiber
Perrine Berger, Thales Research & Technology (France)
- 5 Slow and Fast Light Using Photonic Crystal Structures
David D. Smith, NASA Marshall Space Flight Center (United States)
- 6 Sensors Using Slow and Fast Light I
Gour S. Pati, Delaware State University (United States)
- 7 Sensors Using Slow and Fast Light II
Zongfu Yu, Stanford University (United States)
- 8 Theoretical Studies in Slow and Fast Light
Thomas F. Krauss, University of St. Andrews (United Kingdom)
- 9 Slow and Fast Light for Optical Communication, Optomechanics, and
Microwave Photonics
Stefania Residori, Institut Non Linéaire de Nice Sophia Antipolis (France)
- 10 New Directions in Slow and Fast Light I
Jacob B. Khurgin, The Johns Hopkins University (United States)
- 11 New Directions in Slow and Fast Light II
Girish S. Agarwal, Oklahoma State University (United States)
