Proc. of SPIE Vol. 12852 1285201-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Quantitative Phase Imaging X*, edited by Yang Liu, YongKeun Park, Proc. of SPIE 12852, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

METHOD I

12852 02 **In vivo light-field encoded nano-imaging in a narrow space (Invited Paper)** [12852-1]

METHOD IV

12852 03 **Label-free electro-optical imaging of nanopatterned surfaces and biological cells by electrically actuated quantitative phase microscopy** [12852-17]

METHOD V

12852 04 **Long-time nanoscopic bioimaging by phase-intensity nanoscopy (Invited Paper)** [12852-19]

12852 05 **Multiplexing optical diffraction tomography patterns with Fourier synthesis for high-speed volumetric imaging** [12852-22]

12852 06 **Real-time in-vivo volumetric quantitative phase imaging with a compact handheld probe** [12852-24]

APPLICATION II

12852 07 **The effect of expression of tardigrade stress resistance proteins on mechanical properties of cell membrane** [12852-31]

12852 08 **Uncovering real-time interaction of polystyrene particles and cells from scales of Atlantic salmon by quantitative phase microscopy** [12852-32]

12852 09 **Refractive index analysis of KCl treated neurons using holographic tomography** [12852-35]

APPLICATION III

12852 0A **Label-free quantitative phase imaging-based assessment of intestinal inflammation in patients with ulcerative colitis** [12852-37]

ALGORITHM/AI

12852 0B **Experiment-data-free self-supervised neural network for holographic microscopy imaging (AI/ML Best Paper Award in BiOS) [12852-42]**

POSTER SESSION

12852 0C **Experimental measurement of complex elements of correlation matrix of polarized light [12852-48]**

12852 0D **Tracking cellular and subcellular dynamics with quantitative oblique back-illumination microscopy [12852-49]**

12852 0E **Quantitative phase microscopy by a glass microsphere and plate [12852-51]**

12852 0F **Integration with one partial derivative applied to quantitative phase imaging [12852-52]**

12852 0G **Wide dynamic range imaging with bidirectional quantitative scattering microscopy [12852-54]**

12852 0H **A framework for explainable deep learning for aiding clinical applications of quantitative phase imaging [12852-68]**

12852 0I **Multimodal fluorescence microscopy and 3D quantitative phase imaging/refractive index tomography in thick tissue samples [12852-75]**

12852 0J **Digital holographic microscopy with downstream biochemical analysis for in vitro cytotoxicity assessment of polymeric nanoparticles [12852-76]**

12852 0K **Multiparametric quantitative phase imaging as a tool to assess breast cancer response to therapy in patient-derived models [12852-79]**

12852 0L **Phase from defocus: transport of intensity or in-line holography? [12852-86]**

12852 0M **Quantitative study of phase sensitivity in immersion-based lensless digital holographic microscopy [12852-88]**

12852 0N **3-channel multiplexed lensless holographic microscope for comparative examination of live cell cultures [12852-92]**

12852 0O **An optimization approach to transport-of-intensity equation for high resolution quantitative phase imaging [12852-93]**

12852 0P **Quantitative phase microscopy in a single-shot using the Pancharatnam-Berry geometric phase [12852-99]**

12852 0Q **Gender classification using convolutional neural networks based on fingerprint analysis with in-line digital holography [12852-100]**

DIGITAL POSTER SESSION

- 12852 OR **Metasurface-enabled single-shot isotropic differential interference contrast (DIC) microscopy (Invited Paper)** [12852-4]
- 12852 OS **Accurate phase reconstruction in digital holography microscopy using Fresnel biprism** [12852-97]

Conference Committee

Symposium Chairs

Sergio Fantini, Tufts University (United States)
Paola Taroni, Politecnico di Milano (Italy)

Program Track Chairs

Ammasi Periasamy, University of Virginia (United States)
Daniel L. Farkas, University of Southern California (United States) and
Spectral Molecular Imaging (United States)

Conference Chairs

Yang Liu, University of Illinois Urbana-Champaign (United States)
YongKeun Park, KAIST (Korea, Republic of)

Conference Program Committee

Tatiana Alieva, Universidad Complutense de Madrid (Spain)
George Barbastathis, Massachusetts Institute of Technology
(United States)
Liangcai Cao, Tsinghua University (China)
Shwetadwip Chowdhury, The University of Texas at Austin
(United States)
Pietro Ferraro, Istituto di Scienze Applicate e Sistemi Intelligenti
"Eduardo Caianiello" (Italy)
Björn Kemper, Universitätsklinikum Münster (Germany)
Jerome Mertz, Boston University (United States)
Aydogan Ozcan, University of California, Los Angeles (United States)
Demetri Psaltis, Ecole Polytechnique Fédérale de Lausanne
(Switzerland)
Monika Ritsch-Marte, Medizinische Universität Innsbruck (Austria)
Francisco E. Robles, Wallace H. Coulter Dept. of Biomedical
Engineering at Georgia Institute of Technology (United States)
Balpreet Singh Ahluwalia, UiT The Arctic University of Norway
(Norway)
Peter T. C. So, Massachusetts Institute of Technology (United States)
Laura Waller, University of California, Berkeley (United States)
Renjie Zhou, The Chinese University of Hong Kong (Hong Kong, China)
Thomas A. Zangle, The University of Utah (United States)
