

PROCEEDINGS OF SPIE

Quantum Communications and Quantum Imaging XXII

**Keith S. Deacon
Ronald E. Meyers**
Editors

**18–20 August 2024
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 13148

Proceedings of SPIE 0277-786X, V. 13148

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Quantum Communications and Quantum Imaging XXII, edited by Keith S. Deacon,
Ronald E. Meyers, Proc. of SPIE Vol. 13148, 1314801 · © 2024 SPIE
0277-786X · doi: 10.1117/12.3054081

Proc. of SPIE Vol. 13148 1314801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Quantum Communications and Quantum Imaging XXII*, edited by Keith S. Deacon, Ronald E. Meyers, Proc. of SPIE 13148, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

QUANTUM IMAGING AND QUANTUM SENSING

13148 02 **New protocols of quantum imaging at INRIM (Invited Paper)** [13148-1]

QUANTUM COMMUNICATIONS

13148 03 **Long-distance quantum-secured optical channels in operational environments** [13148-7]

13148 04 **The influence of an eavesdropper in point-to-multipoint QKD based on passive beam splitters on the photon number yields** [13148-10]

13148 05 **Experimental testbed for free-space quantum communication links with polarization entanglement (Invited Paper)** [13148-11]

QUANTUM SCIENCE AND TECHNOLOGY I

13148 06 **Searching for a pixel's position in a grayscale quantum image with Grover's algorithm** [13148-14]

13148 07 **Toward practical generation of non-Gaussian states for time-domain-multiplexed optical quantum computer (Invited Paper)** [13148-15]

QUANTUM SCIENCE AND TECHNOLOGY II

13148 08 **Prospects of scalable quantum key distribution using nano satellites (Invited Paper)** [13148-17]

QUANTUM SCIENCE AND TECHNOLOGY III

13148 09 **Counterfactual control and quantum contextuality in multi-mode interferometers (Invited Paper)** [13148-19]

13148 0A **Towards a thin-film lithium niobate nanophotonic cavity-enhanced telecom-compatible quantum memory (Invited Paper)** [13148-20]

13148 0B **Redefining the limiting noise for a high sensitivity ring laser gyro (Invited Paper)** [13148-21]

13148 0C **Propagative quantum optics for stratified nonlinear media** [13148-22]

QUANTUM SCIENCE AND TECHNOLOGY IV

13148 0D **Continuous-variable optical quantum information processing with non-Gaussian states in the time domain (Invited Paper)** [13148-25]

13148 0E **Finite-size effects in metrology-assisted certification of quantum steering** [13148-27]

QUANTUM SCIENCE AND TECHNOLOGY V

13148 0F **Quantum error mitigations for quantum approximate optimization algorithms on IBM quantum processors** [13148-30]

POSTER SESSION

13148 0G **Circuit implementation of Shor's algorithm for the factorization of small integers in Qiskit** [13148-32]

13148 0H **Threshold quantum distillation** [13148-33]

Conference Committee

Program Track Chairs

Alexander M. J. van Eijk, TNO Defence, Safety, and Security
(Netherlands)

Stephen Hammel, Naval Information Warfare Center Pacific
(United States)

Conference Chairs

Keith S. Deacon, DEVCOM Army Research Laboratory (United States)

Ronald E. Meyers, DEVCOM Army Research Laboratory
(United States)

Conference Program Committee

Stefania A. Castelletto, RMIT University (Australia)

Milena D'Angelo, Università degli Studi di Bari Aldo Moro (Italy)

Mark T. Gruneisen, Air Force Research Laboratory (United States)

Richard J. Hughes, Los Alamos National Laboratory (United States)

Yoon-Ho Kim, Pohang University of Science and Technology
(Korea, Republic of)

William J. Munro, Okinawa Institute of Science and Technology
Graduate University (Japan)

Kae Nemoto, National Institute of Informatics (Japan)

Barry C. Sanders, University of Calgary (Canada)

Alexander V. Sergienko, Boston University (United States)

Oliver Slattery, National Institute of Standards and Technology
(United States)

Dmitry V. Strelakov, Jet Propulsion Laboratory (United States)

Shigeki Takeuchi, Kyoto University (Japan)
